Contents

Evaluating the performance for makespan minimisation in no-wait flowshop sequencing 1
J.M. Framinan, M.S. Nagano

Experimental and numerical analysis of the forming process of a CP titanium scoliotic instrumentation 10
F. Toussaint, L. Tabourot, F. Ducher

Analysis of first mode of metal transfer in friction stir welded plates by image processing technique 17
P. Sinha, S. Muthukumaran, S.K. Mukherjee

Injection moulding simulation analysis of natural fiber composite window frame 22
W.A. Wan Abdul Rahman, L.T. Sin, A.R. Rahmat

Microstructure characteristics of Al_2O_3–13 wt.% TiO_2 coating plasma spray deposited with nanocrystalline powders 31
J. Zhang, J. He, Y. Dong, X. Li, D. Yan

Performance of Ti(C,N)-based cermets cutter and simulation technique of cutting process 36
W. Chen, W. Li, N. Liu, H. Yang

Characterization of a powder metallurgy SiC/Cu–Al composite 43
H. Wang, R. Zhang, X. Hu, C.-A. Wang, Y. Huang

Extending the process limits at a collar forming process 49
M. Otto

Reaction synthesis of Fe–(Ti,V)C composites 54
W. Jing, W. Yisan, D. Yichao

Asymmetric two points incremental forming: Improving surface quality and geometric accuracy by tool path optimization 59
A. Attanasio, E. Ceretti, C. Giardini, L. Mazzoni

A new experimental approach to evaluate friction in ring test 68
J.-P. Wang, F.-L. Lin, B.-C. Huang, C.-C. Yun

Optimization of sheet metal forming processes by adaptive response surface based on intelligent sampling method 77
W. Hu, L.G. Yao, Z.Z. Hua

Tool wear and surface roughness during machining of high-temperature aluminized steel. 89
T. Sasaki, T. Yakou

The effect of laser surface texturing on frictional performance of face seal 96
Y. Wan, D.-S. Xiong

Movement behavior in electrostatic separation: Recycling of metal materials from waste printed circuit board 101
H. Lu, J. Li, J. Guo, Z. Xu

Study on the sump and temperature field during low frequency electromagnetic casting a superhigh strength Al–Zn–Mg–Cu alloy 109
Y. Zuo, H. Nagaumi, J. Cui

Effect of adding Sc and Zr on grain refinement and ductility of AZ31 magnesium alloy 116
S.C. Wang, C.P. Chou

(Contents continued on page I)

0924-0136(20080201)197:1/3;1-U

(Contents continued from OBC)

Systematic simulation procedure of peripheral milling process of thin-walled workpiece 122
M. Wan, W.H. Zhang, G. Tan, G.H. Qin

An investigation of step taper-shaped punch in piercing process using finite element method 132
S. Thipprakmas, S. Rojananan, P. Paramaputi

Design, manufacturing and evaluation of the performance of steel like fiber reinforced elastomeric seismic isolators 140
G.D. Ashkezari, A.A. Aghakouchak, M. Kokabi

Processing and dielectric properties of Bi-doped $Sr(Ti_{0.95}Zr_{0.05})O_3$ ceramics 151
Z. Shen, H. Liu, Z. Yao, Z. Wu, M. Cao, D. Luo

An investigation on the wetting of polycrystalline alumina by aluminium 156
A. Sangghaleh, M. Halali

Modelling of an elastomer profile extrusion process using support vector machines (SVM) 161
F.J. Martínez-de-Pisón, C. Barreto, A. Pernía, F. Alba

Piezoelectric and dielectric properties of $PbNb_2O_6$-based piezoelectric ceramics with high Curie temperature 170
Y.-M. Li, L. Cheng, X.-Y. Gu, Y.-P. Zhang, R.-H. Liao

Analysis of wall shear stress in stented coronary artery using 3D computational fluid dynamics modeling 174
V. Dehlaghi, M.T. Shadpoor, S. Najarian

Investigation of critical liquid fraction factor in nodular iron castings by computer simulation 182
L.C. Kumruoglu, A. Özer

A comprehensive characterization of 3D surface topography induced by hard turning versus grinding 189
R.A. Waikar, Y.B. Guo

Comparison of slurry effect on machining characteristics of titanium in ultrasonic drilling 200
R. Singh, J.S. Khamba

Influence of heat-treatment schedule on crystallization and microstructure of bauxite tailing glass–ceramics coated on tiles 206
H. Yang, C. Chen, H. Sun, H. Lu, X. Hu

Parameter identification of superplastic constitutive model by GA-based global optimization method 212
J. Qu, Q. Jin, B. Xu

Three-dimensional modelling of flow curves in co-rotating twin-screw extruder elements 221
M.A. Barrera, J.F. Vega, J. Martínez-Salazar

Genetic algorithm-based burr size minimization in drilling of AISI 316L stainless steel 225
V.N. Gaitonde, S.R. Karnik, B.T. Achyutha, B. Siddeswarappa

Corrosion resistance in FSW and in MIG welding techniques of AA6XXX 237
S. Maggiolino, C. Schmid

Prediction of microstructure and mechanical properties of multipass SAW 241
K.P. Kolhe, C.K. Datta

Numerical study of the optimum degree of cold expansion: Application for the pre-cracked specimen with the expanded hole at the crack tip 250
A. Amrouche, M. Su, A. Aid, G. Mesmacque

Influence of dynamic boundary conditions on preform design for deformation uniformity in backward simulation 255
T. Gao, H. Yang, L. Yuli

Fabrication of pulsed-laser deposited V_2O_5 thin films for electrochromic devices 261
Y. Iida, Y. Kaneko, Y. Kanno

Analytical and empirical modeling of top roller position for three-roller cylindrical bending of plates and its experimental verification 268
A.H. Gandhi, H.K. Raval

Characterization of nanocrystalline NiCuZn ferrite powders synthesized by sol–gel auto-combustion method 279
P.K. Roy, J. Bera

The rheological behaviors of screen-printing pastes 284
H.-W. Lin, C.-P. Chang, W.-H. Hwu, M.-D. Ger

Synthesis of nanocrystalline yttria by microwave-assisted citrate-gel decomposition technique 292
R.V. Mangalaraja, K.V.S. Ramam, J. Ravi, C.P. Camurri

Magnetic properties of Ce,Gd-substituted yttrium iron garnet ferrite powders fabricated using a sol–gel method 296
H. Xu, H. Yang, W. Xu, S. Feng

Finite element simulation of high speed pulse welding of high specific strength metal alloys 301
G. Casalino, A.D. Ludovico

Development of a simple technique for improving the efficacy of fluid flow through the grinding zone ... 306
S. Banerjee, S. Ghosal, T. Dutta

A new approach to preform design in forging process of complex parts 314
M. Sedighi, S. Tokmechi

A mixtures-based model for the grain size dependent mechanical behavior of nanocrystalline materials 325
J. Zhou, Z. Li, R. Zhu, Y. Li, Z. Zhang

Comparison of TIG welded and friction stir welded Al–4.5Mg–0.26Sc alloy 337
A.C. Muñoz, G. Rückert, B. Huneau, X. Sauvage, S. Marya

Representation and control of the cold rolling process through artificial neural networks via sensitivity factors 344
L.E. Zárate, F.R. Bittencout

An overview of the polymer-to-metal direct-adhesion hybrid technologies for load-bearing automotive components 363
M. Grujicic, V. Sellappan, M.A. Omar, N. Seyr, A. Obieglo, M. Erdmann, J. Holzleitner

Effect of controlled-rolling parameters on the ageing response of HSLA-80 steel 374
A.A. Gorni, P.R. Mei

Fourier series based finite element analysis of tube hydroforming—Generalized plane strain model 379
Y. Guan, F. Pourboghrat

Development of an analytical model for warm deep drawing of aluminum alloys 393
H.S. Kim, M. Koç, J. Ni

Thermo-mechanical models of steel solidification based on two elastic visco-plastic constitutive laws 408
S. Koric, B.G. Thomas

Experimental investigation of wire electrical discharge machining of gallium-doped germanium 419
E. Bamberg, D. Rakwal

Fabrication of Ti/polymer biocomposites for load-bearing implant applications 428
J.F. Wang, X.Y. Liu, B. Luan

Study of edge effect and multi-curvature in laser bending of AISI 304 stainless steel 434
G.C. Jha, A.K. Nath, S.K. Roy

Modeling of surface roughness in precision machining of metal matrix composites using ANN 439
A.C. Basheer, U.A. Dabade, S.S. Joshi, V.V. Bhanuprasad, V.M. Gadre

Manufacturing particleboard panels from betel palm (*Areca catechu* Linn.) 445
C.J. Lin, S. Hiziroglu, S.M. Kan, H.W. Lai
